Management of Orofacial Pain. advertisement. Dr. Rupak Sethuraman SPECIFIC LEARNING OBJECTIVES ï'— Various management techniques of orofacial pain ï'— Management of common orofacial pain disorders VARIOUS TREATMENTÂ are widely used: Non steroidal anti inflammatory drugs (NSAIDs) Opioid analgesics Adjuvants such as anti convulsants Topical medications Management of trigeminal neuralgia (TN) ï'— Initial therapy for TN should consist of trials of drugs that are effective in eliminating the painful attacks. ï'— Anticonvulsant drugs are most frequently used and are most effective. ï'— Carbamazepine is the most commonly used drug and is an effective therapy. Multidisciplinary Diagnosis & Management of Orofacial Pain by Henry A. Gremillion, DDS, MAGD. Dentistry has enjoyed a remarkable period of technological and scientific growth over the past several decades. With the increase in life expectancy,
the number of individuals seeking dental care also has escalated. Key members of the clinical service team for multidisciplinary diagnosis and management of TMD/orofacial pain are dentist(s). Goals must be established regarding treatment duration. Success is dependent on regular communication between the team members. Therefore, and a network of consultants in various disciplines of medicine, neurosurgery, growth hormone is produced.
